Ford 351 Windsor Engine Specs

The Ford Small Block is a series of automobile V8 engines built by the Ford Motor Company beginning in July 1961. The engine was discontinued in new trucks (F-Series) after 1996, and new SUVs (Explorer) after 2001, but remains available for purchase from Ford Racing and Performance Parts as a crate engine. The "Windsor" designation is a retroactive applied for the family of engines sharing a ...

Ford Windsor engine - Wikipedia

The 351 Windsor engine was produced by Ford and had a long reign, beginning in the 1960s, and although not commercially available, it is still used by many rebuilding Ford small blocks for their project cars.

351 Windsor Engine Specs - HCDMAG.com

The Ford 351 Windsor engine, often confused with the 351 Cleveland engine, is a 90-degree V8 engine partly produced at the Windsor, Ontario Ford plant. The engine was manufactured from the 1970s through the 1990s and remains popular with car enthusiasts because many aftermarket parts remain available for the engine. ...

351 Ford Windsor Cylinder Head Specifications | It Still Runs

Ford's 289-, 302- and 351-cubic-inch V-8s are small-block engines that most notably powered Mustangs, including the performance Shelby GT models. The major differences between the three engines were their cubic-inch displacement and stroke size. All engines came either with a two- or four-barrel carburetor, and the ...
