Digital screen use is a staple of contemporary life for adults and children, whether they are browsing on laptops and smartphones, or watching TV. Paediatricians and scientists have long expressed concerns about the impact of overusing technology on people's wellbeing. However, new Oxford University research suggests that existing guidance managing children's digital media time may not be ...

Children's screen-time guidelines too restrictive ...

This theory - invented by Abraham Maslow in 1943 - could be useful for your everyday life. The idea is that our needs range from the very basic, such as the things required for our survival, through to higher goals such as altruism and spirituality.

The 5 Levels of Maslow's Hierarchy of Needs and How they ...

Most of us are not what we could be. We are less. We have great capacity. But most of it is dormant; most is undeveloped. Improvement in thinking is like improvement in basketball, in ballet, or in playing the saxophone. It is unlikely to take place in the absence of a conscious commitment to learn ...

Critical Thinking in Everyday Life: 9 Strategies

The problem of induction is the philosophical question of whether inductive reasoning leads to knowledge understood in the classic philosophical sense, highlighting the apparent lack of justification for: . Generalizing about the properties of a class of objects based on some number of observations of particular instances of that class (e.g., the inference that "all swans we have seen are ...

Slice of life describes the depiction of mundane experiences in art and entertainment. In theater it refers to naturalism, while in literary parlance it is a narrative technique in which a seemingly arbitrary sequence of events in a character's life is presented, often lacking plot development, conflict and exposition, and often having an open ending.
